

Irrigation Installation Foreman

Sposato Irrigation Company, Delaware's premiere irrigation contractor, is looking for Residential Maintenance technicians and Foremen. Excellent customer service skills are required. Some experience preferred. Inspections, suggestions for increasing performance and repairs are the main objectives for our technicians. Foremen are needed for installation. Above average pay, health benefits and 401k are available. This is a full time, year round position. Only Applicants with a valid license and good driving records will be considered. If you are looking for a company to grow with, we want to hear from you. Click [Aqui](#) Para Español.

Job Description/Job Responsibilities

Oversee and implement the field installation of irrigation systems according to designs provided by the installation manager. Must possess a good driving record.

- Lead and work alongside your team to complete scheduled jobs in a timely and efficient manner (on time/on budget). Due to seasonal conditions, extended working days and hours may be necessary to complete scheduled jobs in number of days allotted.
- Provide coaching and training to installation team members.
- Flag property for location of heads and zones.
- Identify appropriate locations for valve boxes, controller, tie-in, main line and lateral line configuration.
- Organize work flow and delegate tasks accordingly.
- Ensure truck/trailer is adequately stocked with parts and equipment needed to complete the daily schedule.
- Practice, implement, and enforce all safety protocols including use of cones, vests, hard hats, and PPE. Verify vehicle is equipped with a fire extinguisher and fully stocked first aid kit.
- Report any accidents or personal injuries for yourself or other team members immediately to management, and follow up with an incident report within 24 hours.
- Ensure work is done according to company quality standards.
 - The property should be left in better condition than upon arrival.
- Perform appropriate truck, trailer, and equipment inspections. Document accordingly and report any damage to manager.
- Communication with customer regarding job status, changes, concerns, and welfare of completed system.
- Follow up with customer including system walk through and controller programming information.

- Complete appropriate paperwork daily including vehicle/equipment inspection reports, work orders, parts form, job checklist, and as built property map.
- Assist in writing, editing, updating standard operating procedures and work instructions.

Other duties or tasks assigned by management if the need arises
